

To FCC
From Deaf Hispanic:Evelio

Im hard of hearing, but I born deeply deafmute. I born Cuba for 25 yrs here in Miami. I have three languages. It is hard for me to hear the hearing normal thiers words. I can hear some words and mostly not at all. I must need relay services intepreter can help me fast. The hearing user call as long as taking too much in many hours. Me always less 20 minutes each calls depending hearing but if I have a new date woman I can talk more one to two hours that is the same hearing that is my right civil. Please do not cut vrs it is very important for deafmute.

I hate one things your FCC cut spanish relay interpreter past two yrs. Deaf hispanic in America got upset against FCC is doing wrong. We hispanic have the right communication with other family in country doesnot speak english as the same Puerto Rico belong to USA but still your FCC are discriminated with hispanic population. let'sme explain one thing important our president of USA and members congress communicate with south american eropean around the world how intepreter relay on the phone and live on TV around the world communication that is beautiful intepreter hearing, Ohh what is about Deaf Hispanic frustation and suffering of life communication what we need the right fair with hearing world.

I hope you see all deaf, deafmute, hard of hearing and hearing impaired still complain your rules under FCC is doing error. I hope you do to go to learn sign languages school you will realize the deaf culture is different than hearing world taht you will find yourself you will apology to the deaf cultures.

Look at all my paragraphs what I did write this complain. if you dont understand this reading my second languages America Sign Languages. If you dont understand this so please, ask skill specialist intepreter hearing understand what I m writing this letter. The intepreter will tell you and help you what I mean ASL writen.

I m continue to fight my right.....

Many thank you
Evelio
